

Immunotec's F.I.T.T. Future In Thinning Technology™ Weight-Loss System

MEDICAL PERSPECTIVES ON WEIGHT CONTROL

For decades doctors have approached weight-loss by suggesting we eat less and exercise more. Although this is very sound advice, it only addresses part of the problem and its track record of success is clearly suboptimal. Newer approaches view long-term weight control as requiring a multi-faceted strategy including proper nutrition, lifestyle modification, stress control and the appropriate use of supplementation. All of these factors were taken into consideration during the development of the F.I.T.T. system.

Tired of Dieting?

We all know that bad diets are like history... they keep repeating themselves.

Now is the right time to try a system that **WILL** stack the odds in your favor to help take the weight off, and more importantly keep it off.
